VATUS

Architecture • Development • Construction

WEBSITE CREATIVE & DEVELOPMENT BRIEF

English master brief for design, development and content implementation

Homes designed for better living.

Version 1.0 • September 2026

1

Project Goal

A premium, architecture-led residential website that works for VATUS today and scales into higher-end development in the future.

VATUS should be presented as an architecture-led residential development and construction company - not as a Minha Casa Minha Vida builder. Some homes may sit within price ranges compatible with housing finance programmes, but that must remain a property-level attribute, not the identity of the brand.

The website must communicate four things within the first 30 seconds:

1. VATUS is led by architecture and spatial thinking.
2. The company is shaped by more than 26 years of international experience across the United States and United Kingdom.
3. VATUS focuses on the aspects of a home that affect everyday life: space, light, air, temperature, sound, material choice and build quality.
4. The brand can create thoughtfully designed homes across different price levels - from current attainable residences to future high-end homes.

Brand Core

Brand	VATUS
Descriptor	Architecture • Development • Construction
Primary line	Homes designed for better living.
Core proposition	Thoughtful residential architecture + careful construction + international experience + local understanding.

2

Site Architecture

Keep the initial site deliberately small, editorial and easy to navigate.

Primary pages

5. HOME - one long, highly visual page containing the complete brand proposition, work, design approach, construction quality, selected residence, Journal preview and contact.
6. JOURNAL - editorial content on architecture, construction, materials, comfort and better residential design.
7. ABOUT / BIO - the founder story: United States -> United Kingdom -> Brazil.

Projects and Contact should initially work as sections/anchors on the Home page. Individual project pages should be supported by the CMS from day one so they can be launched later without redesigning the site.

Main navigation

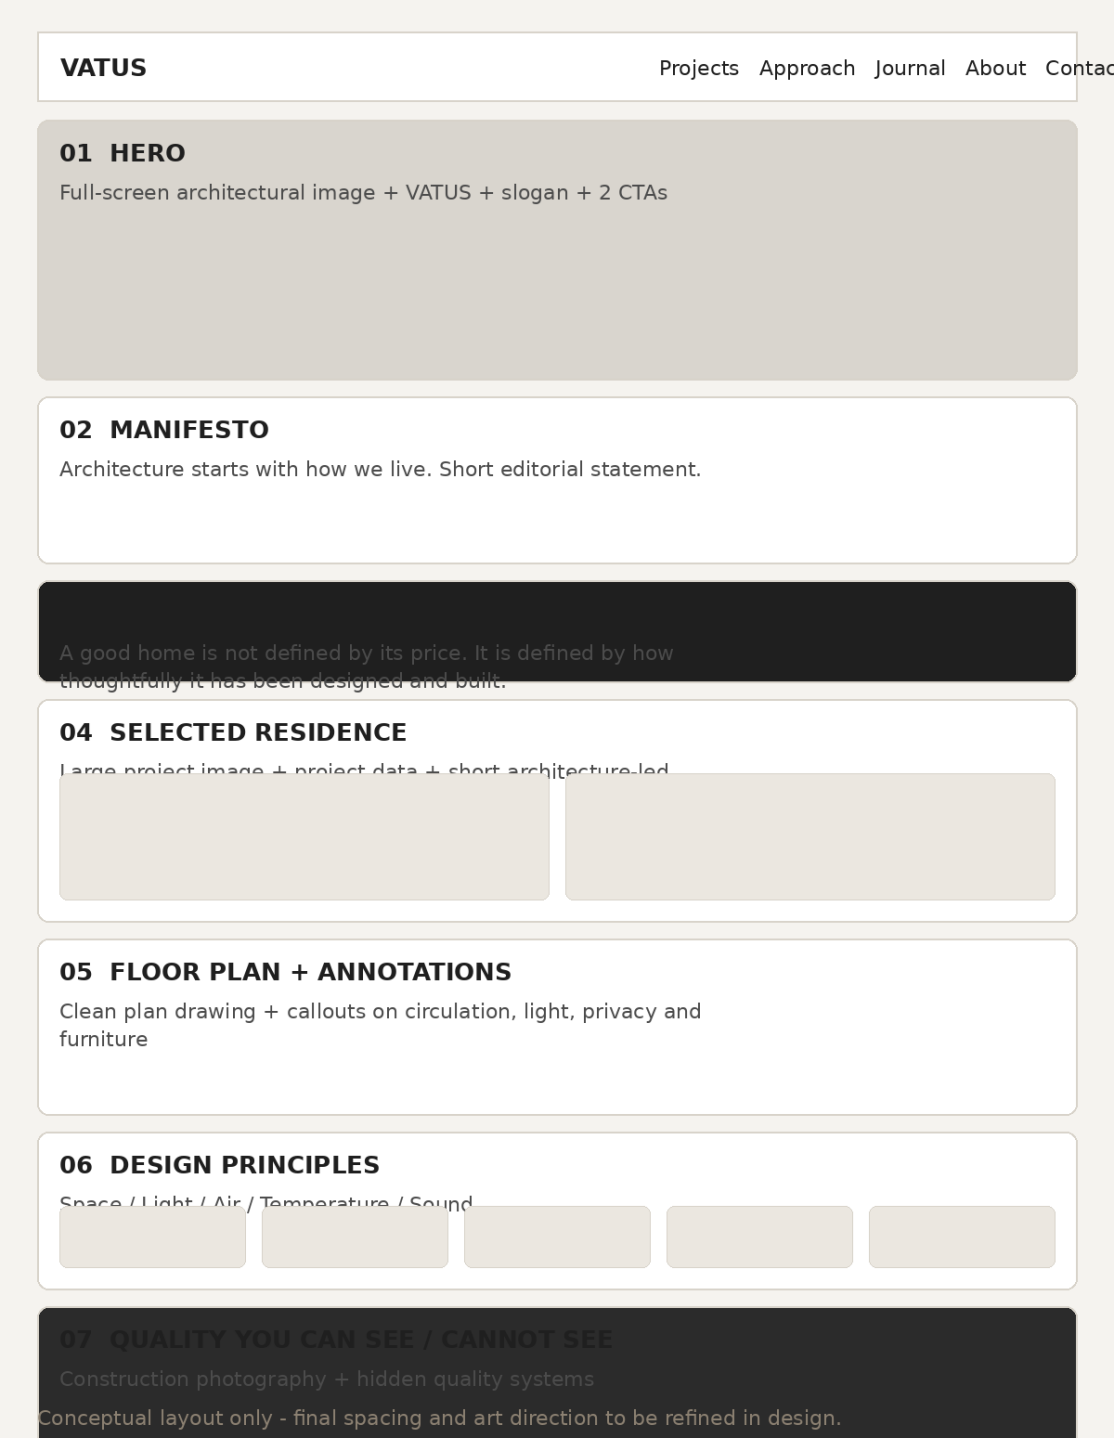

- Projects

- Approach
- Journal
- About
- Contact

Do not place “Minha Casa Minha Vida”, “Financing”, “Cheap Homes” or “Affordable Houses” in the primary navigation.

Homepage - Desktop Layout

Conceptual order and hierarchy. The final design may refine proportions, but should preserve the editorial rhythm and section logic.

Homepage - Section-by-Section Specification

HOME SECTION 01

Hero

Purpose: Establish VATUS immediately as a refined architecture + development + construction brand. No financing language.

Layout: Full-screen or near full-screen architectural image. Minimal copy. Avoid carousel. One exceptional image is stronger than five average images.

VATUS

Homes designed for better living.

Architecture, development and construction shaped by more than 26 years of international experience across the United States and United Kingdom. Now creating homes in Goiânia and its surrounding region.

CTA: Explore our work | About VATUS

HOME SECTION 02

Manifesto

Purpose: Explain the architectural thinking in a concise, emotional way.

Layout: Large white-space section. Editorial typography. One supporting architectural detail image optional.

Architecture starts with how we live.

We do not begin a home with its façade. We begin with the people who will live inside it.

How morning light enters a room. How air moves through the house. How the kitchen relates to the living space. Where furniture naturally belongs. How privacy is created. How sound travels. How the building responds to heat. And how every square metre contributes to everyday life.

The architecture grows from these decisions.

HOME SECTION 03

Brand Statement

Purpose: Deliver the core positioning in one memorable statement.

Layout: Oversized typography. Can use dark background or high-contrast break between light sections.

A good home is not defined by its price.

It is defined by how thoughtfully it has been designed and how carefully it has been built.

HOME SECTION 04

Selected Residence

Purpose: Show the current product without lowering the brand.

Layout: Large exterior image first, then project facts and a clean two-column image/text composition.

VATUS Residence 01

Recanto do Bosque — Goiânia, Brazil

Approx. 90 m² • 3 Bedrooms • 2 Bathrooms • Contemporary Residential Architecture

A compact contemporary residence designed around efficient use of space, natural light and everyday comfort.

The project demonstrates a principle central to VATUS: a controlled construction budget should never be an excuse for poor architecture.

Every area has been considered in relation to furniture, circulation, daylight, ventilation and the way a family actually uses a home.

CTA: Explore the design | Enquire about availability

HOME SECTION 05

Project Gallery

Purpose: Let the architecture speak visually.

Layout: Use 4-6 high-quality images: façade, living/kitchen, bedroom, bathroom, outdoor/rear area, construction/detail. Prefer asymmetric editorial grid on desktop and simple vertical flow on mobile. Avoid autoplay sliders.

HOME SECTION 06

Floor Plan

Purpose: Prove the architect-led value of the product.

Layout: Use a redrawn presentation plan, not a raw technical CAD sheet. Add clean numbered callouts or interactive annotations. The plan must be zoomable on mobile.

Every square metre has a purpose.

- Efficient circulation - reduce unnecessary circulation so more area becomes genuine living space.
- Connected living - living, dining and kitchen are considered together.

- Usable bedrooms - plan around furniture, wardrobes, circulation, privacy and natural light.
- Natural light - openings are positioned and proportioned as part of the architecture.
- Privacy - social and private zones are considered as part of the plan.

HOME SECTION 07

Design Principles

Purpose: Explain how VATUS thinks about comfort.

Layout: 5-column icons/cards on large desktop, 2-column tablet, vertical mobile. Keep iconography simple and architectural.

Designed around people.

- SPACE - Good design is not simply about more square metres. It is about making the square metres you have work harder.
- LIGHT - Window position, orientation and room proportions are considered to create brighter interiors while responding to local climate.
- AIR - Where site and design allow, openings are arranged to support natural air movement.
- TEMPERATURE - Roof construction, insulation, orientation, shading, ventilation and materials all influence comfort.
- SOUND - Room planning and construction systems are considered with privacy and sound transmission in mind.

HOME SECTION 08

Construction Quality

Purpose: Build trust through the parts of a home buyers do not normally see.

Layout: Dark or charcoal background. Use real construction photography, not stock imagery. Detail images can reveal hidden systems before finishes conceal them.

Quality you can see. Quality you can’t.

The quality of a home is not defined only by its flooring, worktops or façade.

Much of what determines whether a house performs well for decades disappears once construction is complete.

- Structure
- Waterproofing
- Electrical installation
- Plumbing
- Roofing
- Insulation
- Drainage
- Junctions between materials
- Fixings and sealing

At VATUS, the elements that will eventually be hidden receive the same attention as the elements that remain visible.

HOME SECTION 09

Materials

Purpose: Create a premium tone while remaining honest about value.

Layout: Large close-up material photography: stone, timber, metal, glass, tile, rendered surfaces. Keep captions minimal.

Material matters.

We do not select materials simply because they are expensive, fashionable or inexpensive.

Each material is considered in terms of its purpose, durability, maintenance, appearance and contribution to the performance of the home.

Our objective is not excess. It is to use the right material in the right place.

Better decisions create better homes.

HOME SECTION 10

Intelligent Use of Resources

Purpose: Explain value engineering without sounding “cheap”.

Layout: Clean editorial section with one process image or material comparison detail. Avoid price graphics.

Intelligent use of resources.

Good architecture does not come from spending without limits. It comes from knowing where investment creates real value.

We look carefully at construction systems, suppliers, materials and detailing to direct resources towards the elements that most influence comfort, durability and everyday experience.

The result is architecture that feels considered rather than excessive.

HOME SECTION 11

International Experience

Purpose: Use the founder’s history as a proof point rather than a slogan.

Layout: Elegant timeline, horizontal on desktop and vertical on mobile.

International experience. Local understanding.

USA | 1999-2008

Hands-on experience in residential construction and building work in the United States.

UNITED KINGDOM | 2008-2026

Architecture, residential development, refurbishment, extensions and construction experience within a mature built-environment market.

BRAZIL | TODAY

Applying decades of international experience to residential architecture and construction in Goiânia and its surrounding region.

The objective is not to reproduce American or European houses in Brazil. It is to bring a culture of planning, detailing and construction quality to projects designed specifically for Brazilian climate, materials and ways of living.

CTA: Read our story →

HOME SECTION 12

Available Residences

Purpose: Allow commercial conversion without turning the site into a property portal.

Layout: Single premium project card with strong image. Future cards can be added through CMS.

VATUS Residence 01

Recanto do Bosque • Goiânia, Goiás • Approx. 90 m² • 3 Bedrooms • 2 Bathrooms

Status: Under Construction / Available

Depending on the buyer's circumstances and applicable lending criteria, certain VATUS residences may fall within the value range of residential financing programmes, including Minha Casa Minha Vida.

Financing approval and programme eligibility are determined independently by the relevant financial institution.

CTA: View Residence | Enquire

HOME SECTION 13

Journal Preview

Purpose: Build authority and long-term SEO value.

Layout: Three editorial article cards. Large image, category, title, short excerpt. No dense metadata.

VATUS Journal

Notes on architecture, materials, construction and the details that make homes better places to live.

- Why good residential architecture starts with the floor plan
- Natural light: one of the most valuable materials in architecture
- Quality you cannot see

CTA: Visit the Journal →

HOME SECTION 14

Contact

Purpose: Make the final step calm, direct and premium.

Layout: Two-column desktop: copy/contact details + enquiry form. On mobile, stack. Include a discreet floating WhatsApp button.

Let’s talk.

Homes. Architecture. Development.

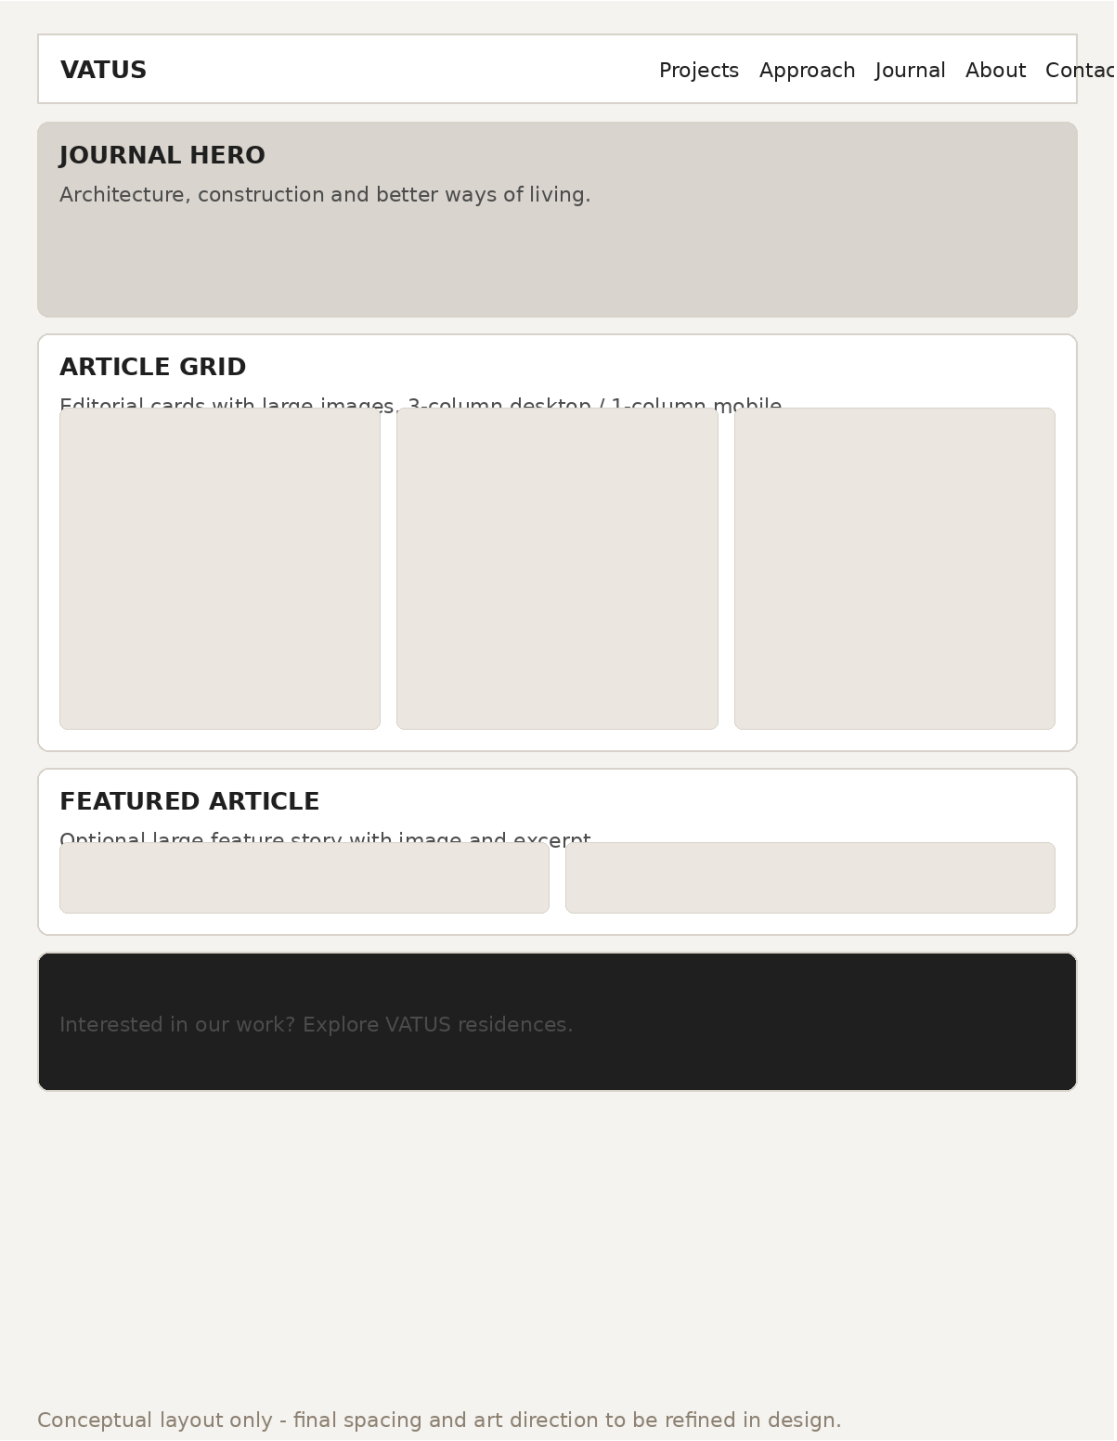

If you are interested in one of our residences, a future VATUS development or would simply like to know more about our work, we would be pleased to hear from you.

CTA: Send enquiry

5

Journal Page

Editorial, useful and search-friendly - not a generic company blog.

Hero copy

Journal

Architecture, construction and better ways of living.

Thoughts, observations and practical insight from our work in residential architecture and construction.

Launch article list

8. What makes a residential floor plan genuinely good?
9. Why a 90 m² house can feel larger than a poorly designed 120 m² house
10. Natural light and residential architecture
11. Designing for the climate of Goiânia
12. Thermal comfort starts before air conditioning
13. Quality you cannot see when buying a new home
14. How we evaluate materials
15. Why affordable architecture does not have to mean inferior architecture

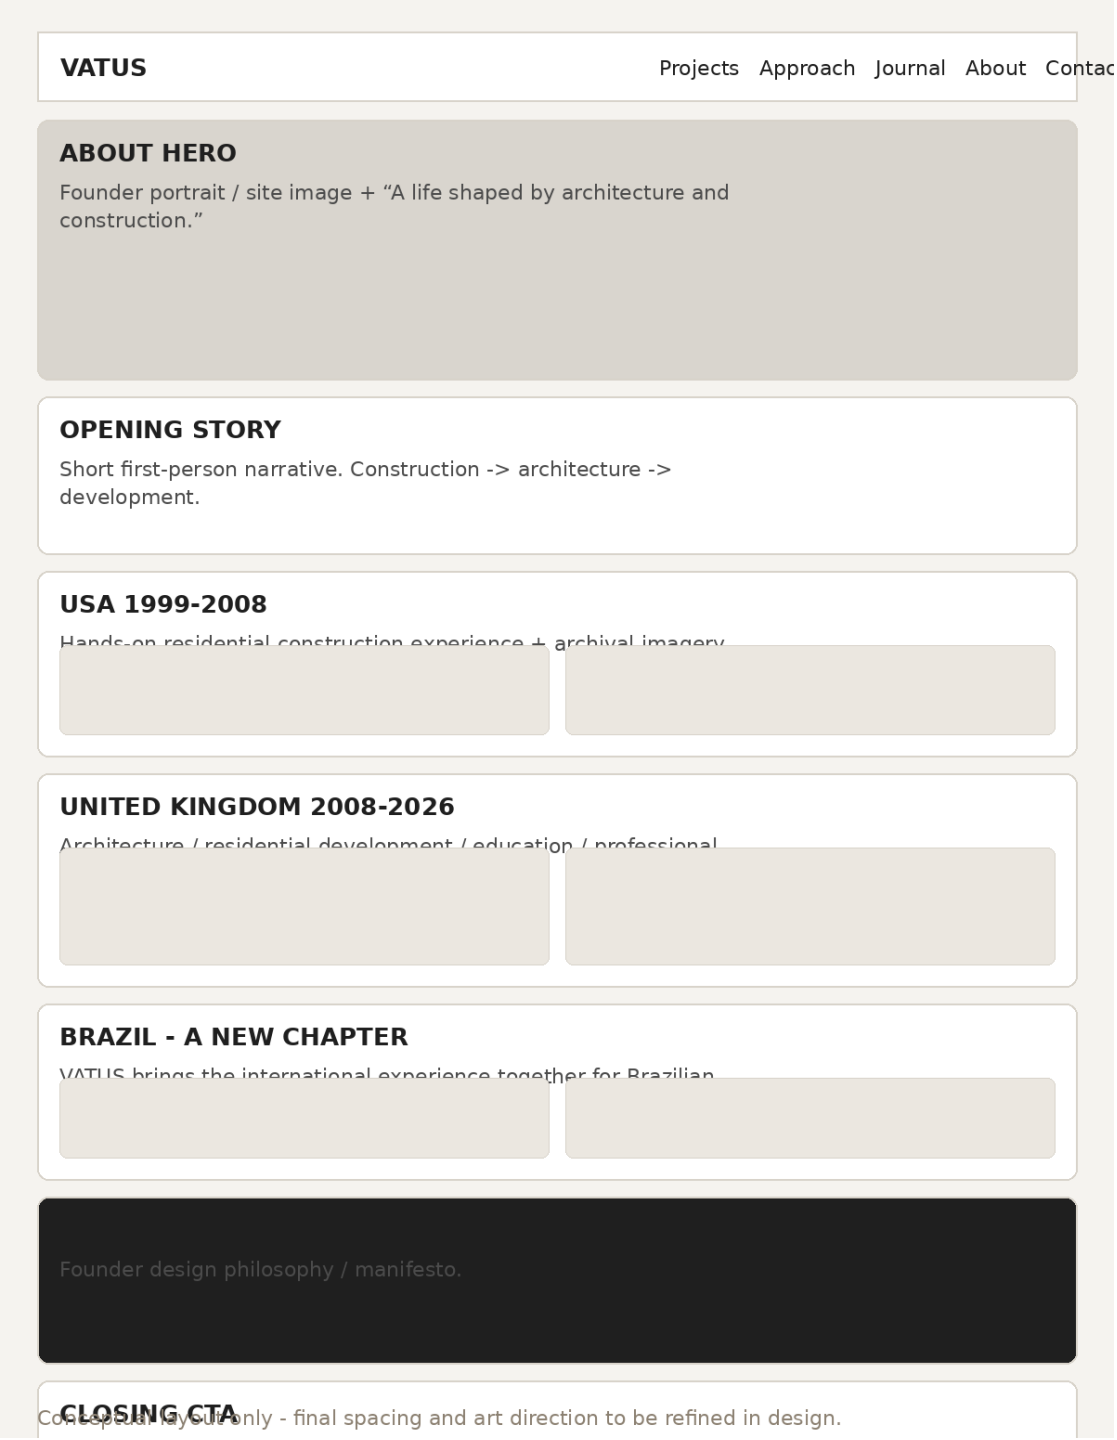

Article template requirements

- Category
- Date
- Reading time
- Large headline
- Short introduction
- Hero image
- Article body with generous spacing
- Diagrams / project photos where relevant
- Pull quote
- Related articles
- Closing CTA: Explore VATUS residences

6

About / Founder Bio Page

The founder story should feel personal, architectural and credible - not like a CV copied onto a website.

Hero

A life shaped by architecture and construction.

From the United States to the United Kingdom. Now building a new chapter in Brazil.

Opening narrative - suggested copy

My relationship with construction began in the United States in 1999.

Working around buildings and construction gave me an understanding that has remained fundamental throughout my career: architecture does not end with a drawing.

A successful building requires the relationship between design and construction to work from the beginning.

Over the following decades, my experience moved from the practical side of building towards architecture, residential design and development. That journey took me from the United States to London and, eventually, back to Brazil.

United States | 1999-2008

My early professional experience was developed in the United States, where I gained direct exposure to construction and the practical realities of building. Those years created a lasting respect for execution, sequencing, materials and the relationship between what is drawn and what is actually constructed.

United Kingdom | 2008-2026

Moving to London opened the next chapter of my career. My work developed increasingly towards architecture and residential projects, including refurbishment, extensions, planning, technical design and the coordination of construction. Working within the UK built environment strengthened my approach to regulation, detailing, building performance and the responsibility architects have for the way people experience space.

Professional/education block: use exact official qualification titles and memberships once verified for publication. Present them cleanly as credentials, not as a long CV.

Brazil | A new chapter

VATUS brings these experiences together. The objective is not to import an American or British architectural style into Brazil. Brazil has its own climate, materials, culture and way of living.

Instead, VATUS applies principles developed through decades of international experience: thoughtful planning; efficient use of space; attention to detail; respect for building performance; appropriate material selection; and careful execution.

The result should feel Brazilian, but benefit from a much broader architectural and construction perspective.

Founder philosophy

What I believe.

I believe architecture should improve ordinary life.

A window should be where it is for a reason.

A room should work with furniture inside it.

Natural light should be considered before artificial light.

Materials should be chosen for more than appearance.

Comfort should include temperature, sound, privacy and movement.

And the parts of a building that cannot be seen after completion deserve just as much attention as those that can.

These ideas form the foundation of VATUS.

Different countries. Different building cultures. One philosophy.

Design carefully. Build properly. Create homes that last.

7

Art Direction & Visual System

The website should feel like an architecture studio / design-led developer - not a generic construction company or property portal.

Desired attributes

Architectural	Minimal	Editorial	Refined	Warm	Contemporary
Premium	Calm	Precise	Human	Confident	Not pretentious

Avoid

- Generic Brazilian builder visual language.
- Property-portal aesthetics.
- MCMV sales landing page style.
- Black-and-gold “luxury” clichés.
- Corporate blue gradients.
- Stock photography of people holding keys or shaking hands.
- Aggressive discount language, countdowns or “buy now” mechanics.

Colour direction

Primary: warm off-white. Secondary: charcoal / near-black. Accent: one restrained natural architectural tone such as warm stone, terracotta, muted olive or bronze. Photography should provide most of the colour.

Typography

Use a maximum of two type families: one refined display face for large architectural headlines and one highly legible sans-serif for body copy. The visual reference should feel closer to an editorial architecture publication than a real-estate brochure.

Desktop headlines may be very large (approximately 72-120 px where appropriate), with generous line spacing and white space. Mobile type must scale elegantly without oversized wrapping.

8

Photography, Drawings & Media

Photography will determine whether the website feels premium or generic.

Required image categories

- Finished architecture - exterior elevations and key spatial moments.
- Interior spaces - especially natural light and indoor/outdoor relationships.
- Details - junctions, surfaces, handles, material interfaces and craftsmanship.
- Construction - structure, waterproofing, installations, roofing, insulation, panels, foundations and hidden systems.
- Drawings - clean presentation floor plans and selected architectural details.
- Process - occasional site photography that reinforces care and thinking.

Do not populate design gaps with generic stock architecture. If a final image is not yet available, use a deliberate placeholder in staging and replace it before launch.

Founder photography

Use a professional founder portrait or a photograph taken in an architectural / construction environment. Avoid the conventional arms-crossed corporate portrait. A black-and-white or desaturated image can work well if it matches the overall art direction.

9

Responsive Behaviour & Interaction

Brazilian visitors will often arrive from Instagram or WhatsApp on mobile. Mobile quality is therefore a first-class requirement, not a reduced desktop version.

Mobile priorities

- Fast loading and appropriately compressed responsive images.
- Large readable typography with strong hierarchy.
- Simple menu and clear anchor navigation.
- Floor plans that can be enlarged or opened full-screen.
- Discreet WhatsApp access without intrusive popups.
- Short contact form and large tap targets.
- No tiny technical drawings or hover-only interactions.
- Gallery order must still tell the architectural story in a vertical sequence.

Animation

Animation should be subtle and support the architecture rather than become the experience itself.

- Slow image reveal
- Gentle text fade

- Very subtle parallax
- Plan annotations appearing progressively
- Image scale around 1.00-1.02
- Smooth anchor/page transitions

Avoid flying objects, excessive scroll choreography, 3D gimmicks, constantly moving text and autoplay sliders.

10

CMS & Technical Build Requirements

The first release is small, but the architecture must support growth without a redesign.

Project CMS model

Each future residence/project should support the following fields:

- Project name
- Location
- Area
- Bedrooms
- Bathrooms
- Status
- Price (optional)
- Short introduction
- Long architectural concept
- Gallery
- Floor plan(s)
- Construction / material highlights
- Availability
- CTA / enquiry target
- SEO title and meta description

Journal CMS model

- Title
- Slug
- Category
- Author
- Publication date
- Reading time
- Hero image
- Excerpt
- Body content
- Inline images / diagrams
- Pull quote
- Related articles
- SEO title / meta description
- Social share image

Bilingual readiness

The final website should support PT-BR and EN with separately managed content. Portuguese should become the default for visitors in Brazil. Do not use browser auto-translation as the production solution. The English content in this brief is the master development copy and can later be translated/adapted for Portuguese.

Performance / accessibility

- Responsive image formats and lazy loading where appropriate
- Semantic heading structure
- Keyboard navigability
- Visible focus states
- Adequate colour contrast
- Alt text fields in CMS
- Optimised font loading
- Core Web Vitals considered during build
- Contact form spam protection without harming UX

11

SEO & Search Structure

The website should build authority around residential architecture and new homes in Goiânia rather than chase only transactional keywords.

Homepage metadata - draft

Title: VATUS | Architecture, Development & Construction in Goiânia

Meta description: VATUS creates thoughtfully designed residential architecture in Goiânia, combining more than 26 years of international experience with careful planning, construction quality and contemporary design.

Portuguese search themes for the future

- arquitetura residencial Goiânia
- casas novas Goiânia
- casas contemporâneas Goiânia
- arquiteto Goiânia
- construção residencial Goiânia
- casa bem projetada
- conforto térmico Goiânia
- casa nova Goiânia
- casas à venda Goiânia

Journal content should support the brand by answering genuine questions about design, comfort, materials and build quality. Do not create low-value SEO filler.

12

Contact & Conversion Design

The conversion strategy should feel like a conversation with an architecture/development brand, not a sales funnel.

Contact form fields

- Name
- Email
- Telephone / WhatsApp
- I’m interested in: Available residence / Future VATUS developments / Architecture / Residential construction / General enquiry
- Message

Primary button: Send enquiry

WhatsApp

Use a discreet floating WhatsApp control. Suggested pre-filled message: “Hello, I am contacting VATUS through your website and would like more information about your residences.”

Do not claim financing expertise

Do not use “Learn how to finance”, “We arrange your finance”, “Financing made easy” or equivalent language unless VATUS later establishes a verified finance-support process. Financing/programme eligibility should remain a concise property-level note with a clear independent-lender disclaimer.

13

Language Guardrails

Maintain a refined, future-proof brand voice.

Avoid these phrases

- Luxury at an affordable price
- Dream home
- Make your dream come true
- Best price
- Unmissable opportunity
- Your MCMV house
- European standard
- Premium finish at a low price
- Financing made easy

Preferred language

- Thoughtful architecture
- Careful construction
- Designed around people
- International experience. Local understanding.
- Quality you can see. Quality you can’t.
- Intelligent use of resources
- Material matters
- Homes designed for better living.

14

Assets Required From VATUS

The developer should be able to begin the build before every final photo exists, but launch should not depend on generic stock material.

Asset	Minimum for launch	Notes
VATUS logo	SVG + PNG	Provide light/dark versions if available.
Hero architecture image	1 exceptional image/render	Landscape, high resolution.
Residence 01 gallery	6-10 images/renders	Exterior + interior + detail + construction.
Floor plan	1 clean presentation plan	Redraw technical plan if necessary.
Construction photos	8-15 good images	Hidden quality / workmanship focus.
Material images	6-10 detail photos	Can be shot on site / suppliers; avoid generic stock.
Founder portrait	1-3 images	Architecture/site context preferred.
USA archive	Optional 3-8 images	Useful for About page if good enough.
UK archive	Optional 5-10 images	Projects / drawings / site images.
Contact details	Email + WhatsApp + Instagram	Final public contact details before launch.
Legal copy	Privacy / cookie policy	Local legal review recommended.

15

Developer Delivery Checklist

The build is complete only when the experience, content and future scalability are all working.

- ☐ Homepage built as a polished long-form editorial page with all sections in this brief.
- ☐ Journal index + article template implemented.
- ☐ About/Bio page implemented.
- ☐ CMS collections for Projects and Journal created.
- ☐ PT-BR / EN architecture supported, even if Portuguese copy is added after the English build.
- ☐ Home navigation anchors work correctly on desktop and mobile.
- ☐ Floor plan is zoomable / legible on mobile.
- ☐ WhatsApp and contact form work and are tracked.

- ☐ No generic stock content remains at launch.
- ☐ Image compression / responsive formats implemented.
- ☐ Basic SEO fields and social share metadata editable in CMS.
- ☐ Cookie/privacy requirements implemented as applicable.
- ☐ Accessibility basics checked: headings, contrast, focus, alt text, keyboard navigation.
- ☐ Performance tested on mobile connection.
- ☐ Analytics / conversion tracking installed if requested by VATUS.
- ☐ Project architecture allows individual project URLs to be activated later without replatforming.

16

Final Creative Direction

What the visitor should feel after 30 seconds.

01

VATUS is led by architecture.

02

There is genuine international construction and architectural experience behind the company.

03

VATUS pays attention to space, light, ventilation, temperature, acoustics, materials and build quality - not only appearance.

04

The brand is credible for a thoughtfully designed attainable home today and a high-end residence tomorrow.

VATUS

Homes designed for better living.
